

**LAA TYPE ACCEPTANCE DATA SHEET**  
**TADS P05**  
**CATTO**

Issue 1	Initial issue	Dated 16/03/21	JP
---------	---------------	----------------	----

This TADS is intended as a summary of available information about the propeller type and should be used during the overhaul, operation and permit revalidation phases to help owners and inspectors. Although it is hoped that this document is as complete a summary as possible, other sources contain more complete information, e.g. the manufacturer's website.

Section 1 contains general information about the propeller type and its variants.

Section 2 contains information about the propeller type that the LAA considers **mandatory** and must be complied with.

Section 3 contains advisory information that owners and inspectors should review to help them maintain the propeller in an airworthy condition. If due consideration and circumstances suggest that compliance with the requirements in this section can safely be deferred, is not required or not applicable, then this is a permitted judgement call. This section also provides a useful repository for advisory information gathered through defect reports and experience.

**Section 1 Introduction**

1.1 Contact Information

UK Contact: n/a

Manufacturer contact information:

Address: Catto Propellers  
Jackson Westover Airport  
12370 Airport Road  
Hangar 156  
Jackson  
CA 95642

Tel: +1 209 754 3553  
Email: [info@cattoprops.com](mailto:info@cattoprops.com)  
Website: [www.cattoprops.com](http://www.cattoprops.com)

1.2 Description

Owned and operated by Craig Catto, who has been designing propellers since 1974 and has produced over 12,000 propellers for 100 different aircraft types. American produced wooden and composite fixed pitch propellers. Current range of propellers are two or three blades and have a natural hardwood maple core that is CNC cut and encapsulated in fiberglass and carbon fibre composite. Electroformed nickel leading edges are an option. Spinners are also available.

LAA administered types with Catto propellers installed include Avid Flyer, Carbon Cub, Cozy, Just SuperSTOL, Lancair 235, Long-Ez, MW-6, MW-7, Montgomerie-Bensen B8MR, Pitts S-1S, Renegade Spirit, Replica WAR FW-190, Stolp V-Star, Thorp T-18, Van's RV-4, RV-6. RV-7, RV-8 and RV-9, Wittman Tailwind.

**LAA TYPE ACCEPTANCE DATA SHEET  
TADS P05  
CATTO**

**Section 2 Mandatory information for owners, operators and inspectors**

At all times, responsibility for the maintenance and airworthiness of an aircraft (including the propeller) rests with the owner. A condition stated on a Permit to Fly requires that: "*the aircraft shall be maintained in an airworthy condition*".

2.1 Lifed Items

No type-specific information.

2.2 Operator's Manuals

Where possible, the manuals describing setup, operation and maintenance procedures for the propeller should be obtained from the manufacturer or importer and retained with the aircraft's records.

<i>Reference ID</i>	<i>Dated</i>	<i>Description</i>
<a href="#">CATTO-CPX-01 Rev 3</a>	30 Aug 19	Catto Customer Operations and Maintenance Manual

2.3 Maintenance Schedule

<i>Reference ID</i>	<i>Dated</i>	<i>Description</i>
<a href="#">CATTO-CPX-01 Rev 3</a>	30 Aug 19	Catto Customer Operations and Maintenance Manual

Propellers fitted to LAA administered aircraft that are maintained either in accordance with the manufacturer's maintenance schedule, the CAA Light Aircraft Maintenance Schedule (LAMS) [CAP411](#) or the LAA Generic Maintenance Schedule, further details of which can be found in LAA Technical Leaflet [TL 2.19: The LAA Generic Maintenance Schedule](#). Note: The CAA and LAA produced maintenance schedules were originally written around the maintenance requirements of aircraft fitted with traditional aircraft engines and propellers.

Some aircraft may have mandated maintenance requirements and/or schedules which are stated on the aircraft's Operating Limitations document and these must be followed.

More information on maintenance schedules can be found in the [Aircraft Maintenance](#) section of the LAA website.

2.4 Airworthiness Directives

Non-certified type, so no type-specific applicable Airworthiness Directives.

2.5 Mandatory Permit Directives

No type specific MPDs at this time.

Check CAA [CAP 661](#) which lists MPDs issued before 31 January 2012 and is no longer being updated.

## LAA TYPE ACCEPTANCE DATA SHEET TADS P05 CATTO

The CAA now provides links to MPDs issued after 31 January 2012 on the [CAA MPD Listing](#) page of their website.

The LAA website should be checked for MPDs that are non-type specific in LAA Technical Leaflet [TL 2.22: Non-Type Specific MPDs](#).

### 2.6 CAA Mandatory Requirements for Airworthiness CAP747 and Civil Aircraft Airworthiness Information and Procedures (CAAIP) CAP562

No type-specific requirements or information at this time.

CAA publications [CAP747](#) and [CAP562](#) contain information that may be relevant to LAA administered aircraft and should be checked for applicability.

### 2.7 LAA Required Modifications (including LAA issued AILs, SBs, etc)

No type specific required modifications at this time.

### 2.8 Operating Limitations to be Placarded or Shown by Instrument Markings

The Operating Limitations document for the aircraft will specify aircraft and powerplant limitations for that particular aircraft. Where a propeller is being fitted in accordance with a Propeller Type List ([PTL/1](#)), any limitations proscribed by the relevant [PTL/1](#) document must be adhered to.

Notes:

- Refer to the propeller manufacturer's latest documentation for the definitive parameter values and recommended placards.
- Data stated on the aircraft's Operating Limitations document must be displayed by means of cockpit placards or instrument markings.

## **Section 3 Advice to owners, operators and inspectors**

### 3.1 General

Where possible, the manuals describing setup, operation and maintenance procedures for the propeller should be obtained from the manufacturer or importer and retained with the aircraft's records.

### 3.2 Standard Options

There are no Standard Options for any propellers.

### 3.3 Manufacturer's Information (including Service Bulletins, Service Letters, etc)

In the absence of any over-riding LAA classification, inspections and modifications published in the manufacturer's continuing airworthiness data should be satisfied according to the recommendations therein. It is the owner's responsibility to be aware of and supply such information to their inspector.

**LAA TYPE ACCEPTANCE DATA SHEET**  
**TADS P05**  
**CATTO**

Note: The following list may not be a definitive list of all Instructions for Continuing Airworthiness, it will be checked for updates regularly but check manufacturers for current data:

<i>Reference ID</i>	<i>Dated</i>	<i>Description</i>
Catto Propeller Instructions		
<a href="#">Catto Belleville Washer Installation</a>	n/k	Belleville washer installation
<a href="#">LET Application</a>	n/k	Leading edge tape application instructions
Saber Manufacturing Inc Propeller Extensions		
<a href="#">Saber Solid Extension Installation</a>	n/k	Solid propeller extension installation information
<a href="#">Saber Spool Extension Installation</a>	n/k	Spool propeller extension installation information

#### 3.4 Special Inspection Points

No special inspection items known on wooden types but composite types must be carefully inspected for splitting of blade roots and trailing edges.
