

## ENGINES AND PROPELLERS FITTED TO LAA AIRCRAFT

This Technical Leaflet lists all of the propeller/engine combinations that have been approved by LAA Engineering, for information purposes only. This list may be useful when trying to decide which propeller to fit to your aircraft.

This list should be treated with caution, as there is no guarantee that if a combination has been approved in the past it will be approved again today. It follows that none of these combinations can be considered "LAA recommended". Indeed many of them may be far from optimum and may have been approved for a special purpose such as a ferry flight. Those which have been approved on one aircraft only should be treated with particular suspicion.

Propellers are expensive items so if there is any doubt regarding the suitability of any propeller to a particular airframe/engine, LAA Engineering should be contacted for advice.

Unless a particular propeller is specified on the Operating Limitations Sheet of the Permit to Fly of an aircraft, or on the Propeller List PTL/1 for the specific type, it may not be fitted without authorisation from LAA Engineering.

### IMPORTANT NOTE: THE LIST BELOW IS NOT THE PTL/1 PROPELLER LIST

#### ACRO ADVANCED

#### 200 ACRO ADVANCED

Type	Engine Manufacturer	Engine Model	Prop Manufacturer	Prop Model	Prop Pitch	No. Approved	Regn
